## **Pravda 'Whips' Dulles**

Soviet Russia's Communist Party is stepping up its attacks on the United States as the "summit" level Big Four conference gets closer, if it actually ever convenes. Secy. of State John Foster Dulles is the latest "whipping boy" for the Communist Party's mouthpiece Pravda at Moscow.

A top Polish Red writer has charged in that propaganda sheet that Dulles, and his brother, Allen, now head of U. S. Central Intelligence, and W. Averill Harriman, now governor of New York, want to "subjugate the Communist People's Democracies of East Europe." The article also charged this American trip plans to organize a "revengist German wermacht" with the aim of liberating Poland, Czechoslovakia, and other people's democracies.

Incidentally, that is the first time we have heard of the word "liberate" used in a Communist propaganda medium in connection with one of Soviet Russia captive nations, or satellites. The Soviets use the word liberally when mentioning free nations which it intends to bring into the Communist fold, but never have we heard the Reds use it in connection with one of its own "people's democracies."

The word liberate connotes the thought that someone, or something IS captive. The Russians never mention "captive" concerning their own satellites!

We Americans, through the Dulles, Harrimans, and even President Eisenhower, are charged with a desire to subjugate these Red satellites to "recover business interests" once owned by them before these countries were seized by Moscow. Well, who would not harbor a keen desire to regain something stolen from one?

Of course, all this is pure Red propaganda, most of it for home consumption to keep the people of Russia and the satellites from knowing the actual truth concerning Western desires for the return of complete freedom for these captive countries and peoples.

President Eisenhower also was accused in a Pravda front page editorial recently of deliberately trying to "wreck" the projected talks of the Big Four government chiefs. This probably came about when the U.S. and other Western allies backed off from the projected conference after Moscow refused to meet some of the preliminary requisites as laid down by us.

But, being a whipping boy for Pravda is nothing new to the U.S., and Mr. Dulles long has been used to that role in the Russian scheme of things propaganda-wise.
